

Maths and Homework Help

1. Comprehension – Read and Answer

Parents can support children's maths skills in everyday life. You can count stairs, use coins to teach about money, or cook together and talk about measurements. Playing board games like Snakes and Ladders or card games also improves number skills. Talking about numbers daily helps build confidence and makes maths fun.

Answer the following questions (One-word answers):

1. What can parents use to teach about money? _____
2. What game helps improve number skills? _____
3. What helps make maths fun? _____
4. What can you count at home? _____
5. What activity helps with measurement? _____

2. True or False

Write **T** for true and **F** for false.

1. Parents should avoid talking about numbers at home. ____
2. Cooking can help children learn measurements. ____
3. Card games do not help with maths. ____
4. Snakes and Ladders is a useful maths game. ____
5. Talking about numbers makes children confident. ____
